

AES DRILLING FLUIDS

BENEFITS

- Minimizes bottomhole assembly and bit balling
- Useful for rig clean-up - non-caustic and biodegradable
- Performs in most water based systems

APPLICATIONS

- Typically added at 0.5-5% by volume or 1 pail for downhole
- As needed for rig cleaning applications
- Can be added directly to hopper

PHYSICAL PROPERTIES

- Appearance: Blue liquid
- Specific Gravity: 1.02 - 1.03

BLUE MAX[†]

BLUE MAX is a concentrated, cost effective, multi-purpose drilling surfactant that aids to prevent bit balling. It also performs as a cleaning surfactant for rig equipment.

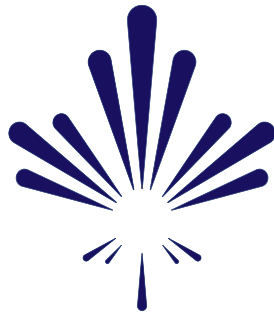

BLUE MAX Surfactant

Treatment Recommendations

Typical concentrations range between 0.5 to 5.0% by volume in the active system or 1 pail for sweeps. BLUE MAX can be added directly to hopper and is compatible with most water based systems.

Packaging and Handling

BLUE MAX is available in 5 gallon pails. Handle BLUE MAX as an industrial chemical, wearing protective equipment and observing precautions as described in the Safety Data Sheet (SDS).
