

AES COMPLETION SERVICES

COMPANY OVERVIEW

BUILT FOR COMPLETIONS

DRIVEN BY RESULTS

AES Completion Services leads the way in providing high-performance completion fluids solutions purpose-built for the Permian Basin. Built on a foundation of technical excellence, operational reliability, and service-driven culture, we are known for our consistent crews and efficient execution.

Formerly HydroLite, the company was founded in 2021 and acquired in 2024. Now backed by the extensive infrastructure and chemical manufacturing capabilities of AES Drilling Fluids and the CES Energy Solutions family, we deliver fast, reliable service at the wellsite.

Customer focus is the foundation of AES Completion Services. Our team works side-by-side with operators to anticipate needs, adapt quickly, and provide tailored solutions for each job. Whether it's a single-well project or a basin-wide campaign, we bring the right chemistry, consistent crews, and operational discipline to every location.

THE SERVICE

HIGH & LOW PRESSURE DRILLOUTS AND CLEANOUTS

Featuring the flagship HydroLite Aphron System for low-pressure operations.

MIXING PLANT SERVICES

Mobile, non-DOT units for rapid deployment.

FILTRATION & SOLIDS PROCESSING

SandCats and flexible rig-up solutions.

RETAIL FLUIDS

Wholesale chemicals and kill mud.

**FLUID.

TECHNOLOGY AND EQUIPMENT

Technology Spotlight: **HydroLite Microbubble System**

- Non-HAZMAT surfactant blend for encapsulated air bubbles
- Reduced water usage and environmental impact
- LCM-like effect improves loss circulation performance
- Compatible with coiled tubing and stick pipe

Equipment Highlights

- 45 bbl mixing tub / 25 bbl sweep tub with shearing hopper
- 6x5 centrifugal pump, 10 bpm capability
- Lightweight trailer for easy mobilization
- Solids control: SandCat shakers, rig-up flexibility
- Centrifuge rental and coordination available upon request

QUALITY AND HS&E

At AES Completion Services, quality, safety, and environmental responsibility are fundamental to how we operate in the field. From fluid mixing to filtration and chemical handling, our crews are trained to execute with precision and discipline, ensuring dependable results across every location.

Our commitment to health and safety starts with our people. We hold ourselves to high standards, providing hands-on training and continuous oversight to ensure every team member is equipped to work safely and return home the same way they arrived. We routinely collaborate with customers to enhance site-specific safety measures and mitigate risk wherever possible.

Environmental awareness is built into our operations. Whether managing chemicals, minimizing waste, or protecting the surrounding environment, we prioritize safe handling and responsible deployment of all materials used on site.

Backed by the AES Drilling Fluids infrastructure and the CES Energy Solutions network, we ensure quality control and logistics support that matches the urgency of field demands—so materials arrive safely, efficiently, and ready to perform.

THE AES FOOTPRINT

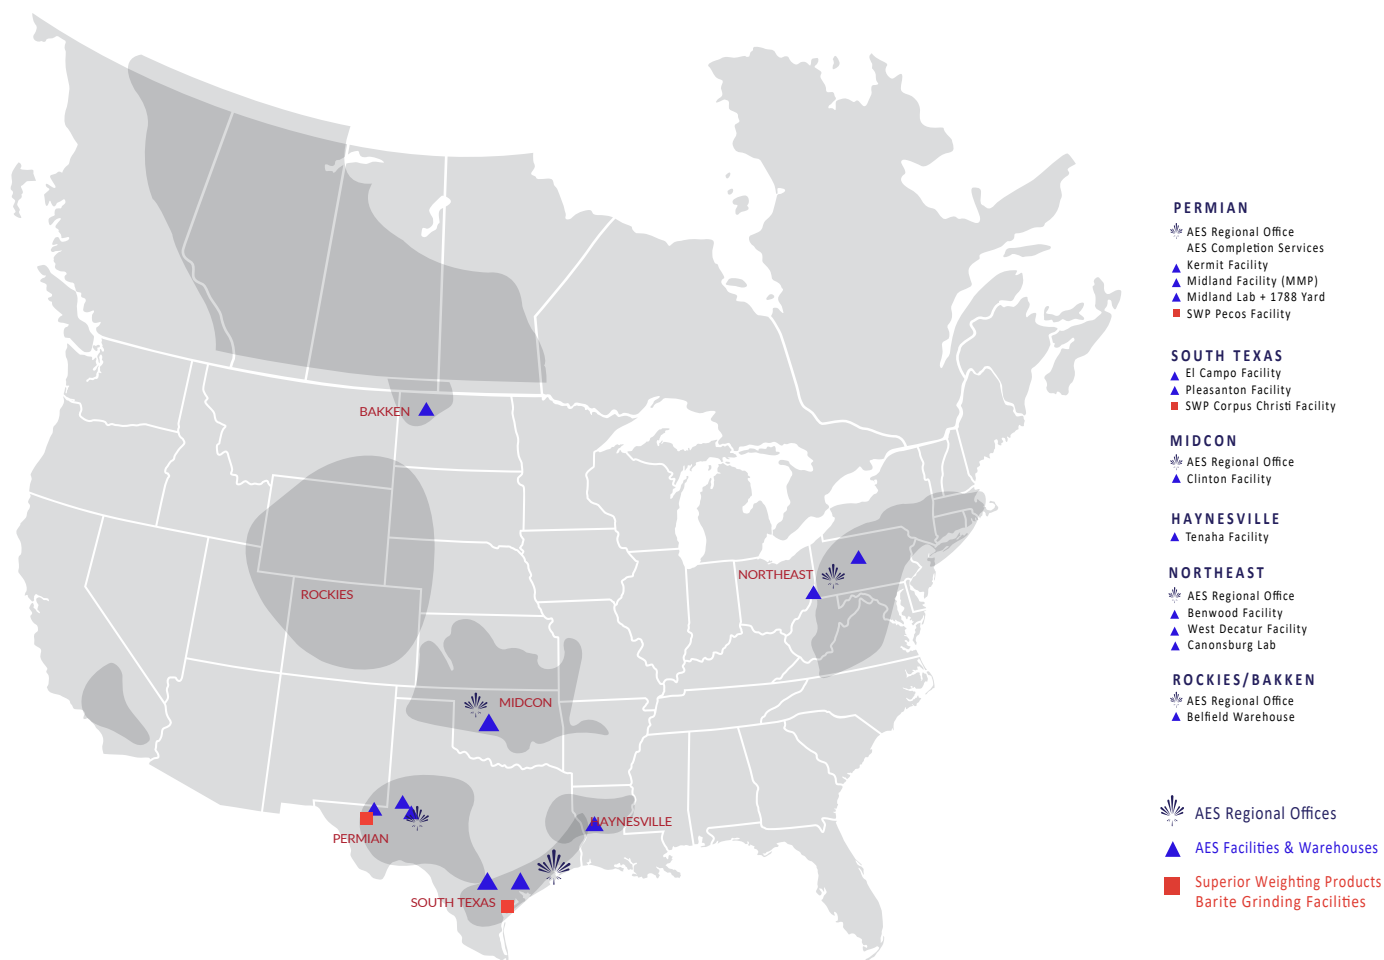

With a strategically positioned footprint across North America, AES Completion Services, AES Drilling Fluids, and Superior Weighting Products are supported by a shared network of infrastructure, laboratories, logistics, and manufacturing.

This integrated platform enables consistent service, rapid response times, and reliable product availability—delivering results wherever our customers operate.

Why Choose AES Completion Services?

- 1,000+ successful operations in 4.5 years
- Consistent crews, mechanically skilled and mud-savvy
- Proprietary chemistry and in-depth technical training
- Lean operations enable fast rig-ups and competitive pricing
- Client-first mindset: engineered for results, not run time.

This integrated platform ensures consistent service, rapid response, and reliable product availability wherever our customers operate.
