

X-OUT⁺

LIQUID AMINE CARBON DIOXIDE SCAVENGER

BENEFITS

- Combats bicarbonate/carbonate contamination.
- Performs in high temperature conditions up to 350°F.
- Effective in pH sensitive polymer based fluid systems.

APPLICATIONS

- 0.25 - 1.5 gal/bbl for most applications (typical).

PROPERTIES

- Appearance: Colorless to amber colored liquid
- Specific Gravity: 1.02
- Flash Point: 218°F

TREATMENT RECOMMENDATIONS

Typical concentrations of 0.25 to 1.5 gal/bbl for most applications, although higher concentrations may be necessary in extreme conditions.

PACKAGING AND HANDLING

X-OUT is available in 5 gallon pails or 55 gallon drums. Handle X-OUT as an industrial chemical, wearing protective equipment and observing precautions as described in the Safety Data Sheet (SDS).
